

## IN GOVERNMENT WE TRUST

### What is One Trillion Dollars?

- If you were given \$1 million dollars per year to spend, it would take you one million years to spend \$1 trillion
- If you are currently earning \$25,000 per year, it would take you 40 million years to earn \$1 trillion
- To count to a trillion, at a rate of one number per second without stopping, would take almost 32,000 years
- **The amount of taxpayer dollars that Congress is currently seeking to spend on the recent stimulus package.**

**Help us stop it! Call your member of Congress at (866) 928-0525 and tell them to oppose the "Stimulus Package."**

Paid for by FreedomWorks [www.FreedomWorks.org](http://www.FreedomWorks.org)
